The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario

Costs over Time	If you exit after 1 year	If you exit after 5 years
Total costs	744 USD	1 667 USD

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
